Summary

FAST NUCES BS Data Science fresh graduate with professional experience in data science, software engineering, and game development. Delivered 20+ industry and client projects spanning machine learning, analytics, full stack applications, APIs, and automation.

Education

FAST NUCES Lahore, Pakistan
Bachelor of Science in Data Science (BSDS) *Aug. 2022 to Aug. 2026*

Experience

Roblox Developer Oct. 2026 to Present
SabaSoft Games Studio *Lahore, Pakistan*

- Developing a Luau puzzle game with pencil movement, animations, obstruction detection, lives, retries, hint rewards, and a grid based system supporting **771 JSON levels**.
- Building responsive mobile and PC UI, debugging dense levels, testing across devices, and organizing reusable modules and assets for team handover.

Data Scientist Aug. 2025 to July 2026
Devnesty Creative Agency *Lahore, Pakistan*

- Engineered end to end data science solutions using Python, Pandas, NumPy, and scikit learn, transforming raw datasets into actionable insights and predictive models.
- Led analytical workflows from EDA, cleaning, statistical analysis, and feature engineering to model evaluation, automated reporting, and interactive Power BI, Tableau, and Streamlit dashboards.

Software Developer June 2025 to Aug. 2025
DevNuts Custom Software Development Company *Lahore, Pakistan*

- Developed Python and MERN application features, REST APIs, MongoDB data models, and React interfaces with validation and error handling.
- Debugged full stack integrations, built reusable UI components, and collaborated on code reviews and feature delivery.

Projects

ShareGo Final Year Project | *Flutter, FastAPI, SQLite, AI*

- Built a cross platform baggage sharing marketplace with authentication, listings, bookings, traveler verification, messaging, and AI chatbot integration.

Energy Trading Platform | *Python, Docker, APIs, CI/CD*

- Developed trading workflows, transaction and data management, API services, containerization, and automated development processes.

Heart Disease Analytics & Classification | *Python, scikit learn, XGBoost*

- Performed EDA, feature engineering, and model benchmarking across Logistic Regression, KNN, Random Forest, SVM, and XGBoost, achieving about 90% test accuracy.

Car Parking Management System | *C#, Image Processing*

- Built a C# parking management system with camera based license plate recognition and iterative integration testing.

Technical Skills

Languages: Python, Luau, JavaScript, C++, C#, SQL, HTML, CSS
AI & Data: Pandas, NumPy, scikit learn, TensorFlow, PyTorch, XGBoost, NLP, BERT, EDA, Power BI, Tableau
Development: FastAPI, Flask, React.js, Node.js, Express.js, REST APIs, MongoDB, SQLite, Flutter, Roblox Studio
Automation & Tools: Selenium, BeautifulSoup, Git, GitHub Actions, Docker, CI/CD, PowerShell, Streamlit

Certifications

DevNuts: Certificate in Python Development and MERN Stack Development, June to Aug. 2025 devnuts.org
